

SUMIN MA

Researcher · Multimodal AI, GUI Agents, Visual Grounding, Agentic AI
suminma@sookmyung.ac.kr · github.com/sumin-ma-1

Research interests

Multimodal AI, GUI agents, visual grounding, referring expressions, agentic systems, tool use, and workflow automation.

Experience

Researcher — Korea Electronics Technology Institute (KETI)

2026 – Present

Agentic AI systems for workflow automation: agent orchestration, tool use, and multimodal grounding from user goals to executable steps.

Undergraduate Researcher — AMS Lab, Sookmyung Women's University

2025 – Present · UI Detection

UI detection and GUI visual grounding for computer-use agents. Ongoing project: ReferAlign.

Selected research

ReferAlign — referential alignment for GUI visual grounding

Ongoing research

Formulates GUI grounding as alignment between referring language and UI region features, instead of unconstrained coordinate generation.

Education

B.S., IT Engineering — Sookmyung Women's University

GPA 4.1 / 4.5

Exchange, Computer Science — Albright College

GPA 4.0 / 4.0
